

## Dry Fertilizers

**Ammonium Sulfate: 21-00-00-24S**

*Applied ammonium sulfate primarily where they need supplemental N and S to meet the nutritional requirement of growing plants.*

**Triple 15: 15-15-15-10S**

*Offers balanced NPK nutrition, in each homogeneous pellet. Triple 15 offers high nutrient value, as well as 200 lbs. of sulfur in every ton. This product is ideal for orchard and row crop applications*

**Triple 20 20-20-20**

*Supplements soil fertilization by supplying essential nutrients when plant food needs are highest such as at flowering and/or fruiting stages or in stress conditions.) It is recommended as a supplement to a conventional fertility program, potentially enhancing yield and/or quality. Avoid spraying during full bloom.*

**Turf Supreme: 16-06-08**

*Our 16-06-08 fertilizer is blended to provide a slow releasing, water activated economical fertilizer. Our 16-06-08 fertilizer is a great mixture for lawns, pastures, wildlife food plots, and just about everything that grows.*

**Tree and Vine: 12-08-16-17S-3Fe-.5Mn**

*Used as topdressing, basal fertilizer as well as seedling fertilizer. Suitable for all types of soil and plants. Specifically designed for high value crops such as vegetables, fruit trees, vines and turf. Utilizes a balanced nitrogen source containing both ammonium and nitrate nitrogen, a combination of fully available phosphorus forms giving longer lasting availability of phosphorus over a wide range of soil types, and a choice of either chloride or sulfate as the potassium source. Contain secondary and micronutrients essential for specific crops.*

**06-24-24 XB+: 06-24-24-5S-1.5Fe**

*An excellent formulation for use as a pre-plant fertilizer for turf, ornamentals, and vegetable gardens or to prepare turf and ornamentals for the stresses of winter. A beneficial supplement fertilizer for soils low in Phosphate and Potash.*

**Urea: 46-00-00**

*Urea contains the highest nitrogen percentage (46%) of all the solid fertilizers and is widely used as a nitrogen fertilizer for plants.*

**K-Mag: 00-00-21-21S-11Mg**

Supplies three vital plant nutrients — potassium, magnesium and sulfur. It is an excellent source of non-chloride potassium, water soluble magnesium and non-acidifying sulfur. An economical source of magnesium and sulfur often used in our custom bulk blend fertilizers.

**Mono-Ammonium**

**Phosphate: 11-52-00**

*An excellent wide range, agronomic choice for all crops requiring nitrogen and phosphorus nutrition.*

**Mono-Potassium**

**Phosphate (MKP): 00-52-34**

*A highly efficient source of phosphorus and potassium for plants. A preferred source of phosphorus and potassium when nitrogen fertilization should be limited. Often used during early growing season, when phosphorus and potassium are needed at high rates for the establishment of root system. Application of MKP at the productive stages of sugar-rich fruit crops helps to increase sugar content and to improve the quality of these.*

**Sulfate of Potash: 00-00-50**

*An excellent high-potassium, low-chloride fertilizer providing essential nutrients that help plants resist disease and pests, ensure a longer shelf life, and produce tastier and more attractive produce without the excess chloride that can harm crops.*

**Muriate of Potash: 00-00-60**

*Enriched source of the mineral potassium for balanced leaf & root growth for vegetables, herbs, flowers, ornamentals.*
